

Geelong Refinery

Reuse and Recycling

WATER RECYCLING

100% of waste water is sent to the Northern Water Plant for recycling and returned for re-use as recycled.

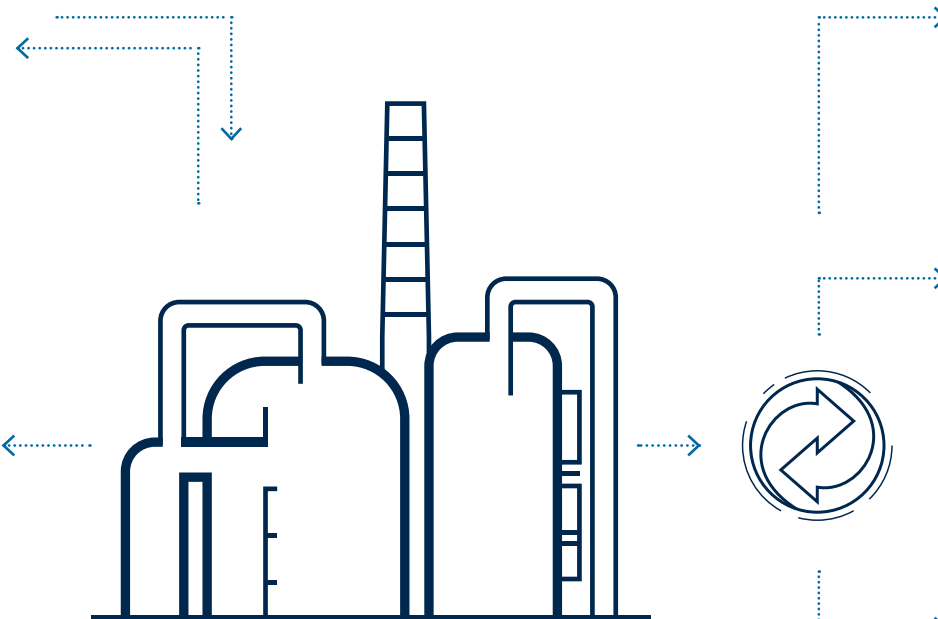

USED CAUSTIC

Reused at Clyde Terminal and the Northern Water Plant operated by Barwon Water.

SLUDGE WASTE

Converted to compost and used on site.

USED CATALYST

Reused by the cement industry.

SCRAP METAL

Recovered and recycled.

TIMBER

Recycled through our onsite waste transfer station and chipped for mulch by the local council.

SULPHUR

Reused in industries including fertilizer manufacture.
